

YAMAHACHI's SDGs Declaration

“ We, YAMAHACHI, aim to be a company that is sought after by the future. ”

Since our establishment, YAMAHACHI has continued to pursue its goal of being the world's No.1 in artificial teeth production. We will continue to seek customer satisfaction and strive to be a company that continues to be trusted by society at large. We share the ideals of the SDGs, which are sincerely committed to solving social issues, protecting the environment and realizing a sustainable society through our business activities.

October 3, 2022

YAMAHACHI DENTAL MFG., CO. - PRESIDENT MASASHI TOYAMA

Contribution to Society

We strive to commercialize products that will contribute to efficiency and save on manpower in the dental laboratory, alleviating some of the social problems caused by the shortage of dental laboratory workers due to an aging society. At the same time, we will endeavor to contribute to society by providing products aimed at improving the patients' quality of life.

Artificial Teeth

Our objective is to improve the conditions of the workplace in the dental care field by providing artificial teeth that are easy to work with and shorten working hours. We also aim to improve the patients' quality of life by providing artificial teeth with excellent wear and stain resistance.

CAD/CAM Products

We contribute to labor saving by developing materials (Resin, Wax, Zirconium, Plaster etc..) used in digital technology-related equipment (Milling unit, 3D Printer etc..) which have become indispensable for shortening the time required for onsite labor in recent years.

Goal in 2025 Launching a product

Goal in 2025 Launching a product

Environmental measures

In order to solve social issues such as air pollution and global warming, we use our improvement proposal system to reduce our impact on the global environment and promote environmental conservation.

Reduction of paper consumption through introduction of ICT technology

Promote computerization of internal documents (electronic pay stubs, electronic invoices, electronic applications, year-end adjustments, introduction of expense reimbursement systems, etc.)

Reduction of waste and materials used

Improvement of product realization rate to reduce materials used and reduce excess packaging, etc.

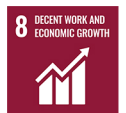

Goal in 2025 Reduction of 300,000 pieces (compared to 2021)

Goal in 2025 Reduce materials used and waste by 5 tons (compared to 2021)

Employee Satisfaction

We strive to create an environment in which employees can work healthily and passionately, and we aim to achieve both employee health and corporate development as a for-profit corporation.

Improvement in the examination uptake rate for periodic health checkups, lifestyle prevention checkups, stress checkups and dental checkups

Maintain certification as an excellent health management corporation

Goal in 2025 100% consultation rate

Goal in 2025 Maintain certification as an excellent health management corporation
